LEVELLED UP WEEKENDS

Steady handling and smart safety systems keep the drive composed on changing roads, so the scenic route feels effortless and the day feels longer.

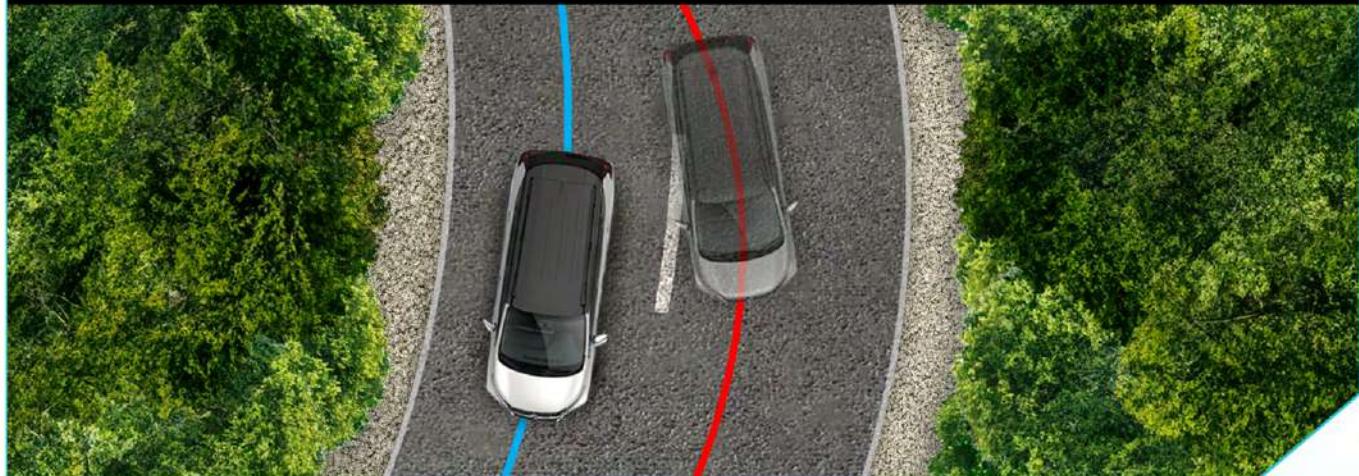

LEVELED UP CONTROL

Stay composed when roads twist or surfaces change. Systems in the background help you hold a clean line and a calm cabin.

Active Yaw Control (AYC)

In quick bends, it seamlessly applies the brake on the inner wheels to help you stay on your intended line.

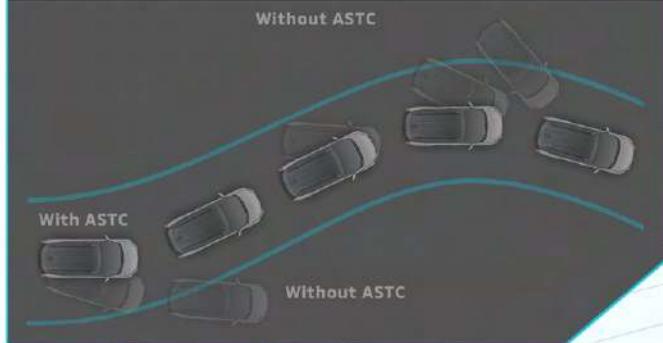

Hill Start Assist (HSA)

Prevents roll-back on hills by holding the brakes for a moment while you move your foot to the accelerator from the brake pedal.

Active Stability Control (ASC) and Traction Control System (TCS)

If a wheel slips or the car starts to slide, it eases power and brakes individual wheels to help you regain grip.
